COMPANY PROFILE

corporate office: 302 Lane 10 ,Kalimati road Sakchi Jamshedpur jharkhand-831001

As we know, Website & Software of your business is as important as your business card. Intranet is the lifeblood of many businesses. However, the increasing cost of in-house resources and extravagant consultant costs make it difficult for small and medium sized businesses to maximize the benefits of these tools. Insight Infosystem now offers low cost website Design ,Mobile application development ,Inbound marketing,Lead generation,Graphic Design and internet marketing ,outsourcing solution that would not impact your customer service and still offer the most affordable rates. Outsourcing complete requirement to insight infosystem would also free your time so that you can focus on running your business more smoothly and dedicatedly Your business is unique, your people are unique,your organization's culture is unique and you as a CEO run your business according to your style of management. I do not take a "one way fits all" approach to your business. I take the time to understand all of those unique attributes that shape your company and how you compete in your industry. I fill in the gaps in the experience level of your teams and I work closely with them to align and focus their efforts to achieve your goals. I also fill in the gaps where you and your teams do not have the time on deliver specific goal.

We at insight infosystem, are a team of strong entrepreneurs who believe that "if you have it in the mind, you will certainly have it in your hand". Our mission is To be driven by The Passion for mutual success " Insight Infosystem is a provider of end-to-end software solutions to businesses and specializes in developing robust, scalable, and cost-effective web-applications. We are constantly enhancing our talent and product portfolio by mastering the latest innovations in technology and creating new cyber solutions for our customers. We take special pride in the high level of integrity with which we handle every project. We deliver consistently as promised - on time and within budget. Earning your trust - and keeping it - is our most important consideration. We have helped many businesses enhance their productivity and maximize their operating efficiency. We specialize in system integration and we really shine when working with large-scale or complicated projects.

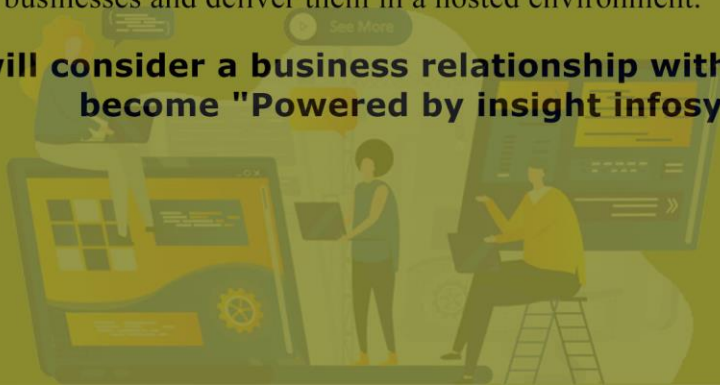

We have helped many customers, who were frustrated with their existing technology partners due to their lack of commitment or expertise, and have been able to foster long-term and rewarding business relationships with them. Our customer reviews are our medals of honor. All our customers know that we'll get the job done, we'll do it right and we'll do it on time. We take your projects - and your business - as seriously as you do.

Please take some time to become familiar with our product and services. Having a diverse group of talent enables us to create dynamic teams of professionals who have the broad spectrum of expertise needed to complete all projects with an unmatched level of professionalism and integrity. It also enables us to create high-quality cyber solutions for businesses and deliver them in a hosted environment.

"I hope you will consider a business relationship with Insight infosystem and become "Powered by insight infosystem".

Mr. Suman Kumar Singh
Chief Executive Officer
M/S Insight Infosystem

PWA Development

Progressive Web App Development

We are a top progressive web app development company having successfully deployed secure and robust web app solutions across all industry verticals. We build cutting-edge web applications that render a 100% immersive experience and function similar to a desktop or mobile app. Through progressive web app development, we help you take your business to the world in a way that the world wants to interact with your business.

Our Progressive web applications ensure smooth performance and render a native alike experience. We work with an aim to optimise and maximise user engagement, and make mobile applications readily accessible with less effort across all platforms.

Our progressive web app solutions come integrated with unique features such as offline browsing, push notifications, data analysis and easy channels of distribution.

We help brands by developing best-in-class progressive web applications that aren't just superfast and lite but also connectivity-independent and compatible across all devices and screen sizes.

Future-ready progressive web app solutions come with an array of benefits.

We take the power of Progressive web app technology and combine it with our extensive Mobile and Web App development expertise to deliver a feature-packed solution. Our progressive web app developers provide a potent combination of technical expertise and deliver meaningful experiences.

Progressive:

Our PWA development services are built around dynamic upgrade, making it easy for our clients to be present across browsers.

Connectivity Independent:

We integrate service workers in such a way that your PWA runs as flawlessly in a no-network condition as it would in a high-quality network environment.

Responsive:

Regardless of the form factors, we build robust progressive web applications that render seamless interactivity across all browsers and devices.

User-Friendly:

The interface that we use for Progressive web app development ensures an intuitive and engaging user experience that transitions seamlessly without any lags across smartphones and tablets.

Re-Engaging:

We build PWAs in a way that search engines can easily discover them, operate offline and be put on the home screen. They are integrated with push notifications to keep less-active users engaged

Low Data Usage:

Your PWAs are built in a way that they take up a very small portion of the limited internet bandwidth that users usually struggle with.

Engineering Drawing

Insight Infosystem is ISO 9001-2015 certified AutoCAD Drafting Services provider offering drafting services for architects, engineers and construction firms. We provide cost effective and high quality AutoCAD drafting services, AutoCAD rendering services, and 2D & 3D design drafting services.

Insight ensures fast turnaround time and accuracy for all types of requirements on AutoCAD services. Our strong industry experience enables us to handle the most sophisticated, voluminous and complex AutoCAD services requirements with precision and high quality.

We are a one-stop solution provider for specialized services in the domain of Architectural, Structural, Electrical, Mechanical & Civil engineering design and drafting.

Our Services

- AutoCAD Drafting
- 2D & 3D CAD drafting,
- Paper to CAD conversion
- Raster to vector conversion
- **Architectural and facility drawings**

We have vast experience and expertise to create 3D modeling of floor plans, convert the 2D floor plans into 3D floor plans and create a 3D model of the said houses or building complexes. We can create interior and exterior views of houses or other complexes using a customized 3D CAD modelling technique which can be used during building construction or renovation.

Architecture is the field that requires a lot of professional agents and people usually don't tend to be attracted for the paper drawings of the layouts. The better way to project it is through 2d drafting which not only gives a clear picture, but it also provides user friendly 2d cad drafting services software that anyone can use and easily extract print outs and make changes to the existing files to get the desired design. Our Architectural services include drafting and detailing for a single villa to large residential and commercial buildings, tenant improvement and construction projects including general layout, plan, elevation and sections. Door and Window details, Floor framing plan, Roof framing plans, Building section, Wall sections, Roof sections, Kitchen details, Toilet details and Reflected ceiling plans are also drafted in 2D. We also provide architectural 2D house plans in CAD according to a particular city code. Our drafting & detailing services are offered to Architects, Engineers, Construction companies, General contractors, Landscapers and Interior designers across the globe.

Graphic Design

Beautiful. Engaging. Creative Designs!

We are a top graphic design company having successfully Designer to design your thought in next level. Brands, Businesses and Websites are all much more than just words and products—they're also images and design. Graphic design is an elemental part of any business and that's as genuine for your company's image as it is for your marketing. Success online is multifaceted in the modernized age. While sites rich in words can help you be found within search results, attracting visitors and converting sales is often influenced by the audio-visual impact. Colorful, high-resolution images, illustrative graphics, and engaging videos can help latent buyers better understand your support and services, and products they see—literally—the benefits they offer.

We believe graphic design is all about getting your message across clearly and with a "Wow!" thrown in for good measure. Graphic design is the fine art of visual communication. Graphic design is also about problem-solving, and we relish that. It's a challenge we are always combat-ready to take on. Our expert graphic designers have a lot of tricks-up their sleeves. If you require graphic design services, chances are, we can assist you to get what you need.

New Trend In Graphic Design

The powerful correlation between professional graphic design and business development is embodied in Insight Infosystem Pvt. Ltd.'s graphic production. Investing in graphic design services sets a brand apart from competitors and associates business identity with an effectual symbol, icon, logo, or image.

Some of Our Clients

Rate & Billings

Insight Infosystem has two general methods of payment for its services: **fixed cost** and **hourly**.

Fixed Cost :

Fixed cost is used primarily when there is a clearly defined project. For example, the goals, tasks, and scope of the project are well defined. This method is often used for our application development efforts in the Windows environment. The end project cost is directly proportional to the complexity and scale of the application and are negotiated on a project-by-project basis.

Hourly Cost:

The hourly method is used when these items are less clear. For example, on an R&D project, or when it is not practical to thoroughly define a project up-front due to time limitations or lack of information. Hourly rates vary based on type of work, the experience level of the person performing the work, and the length of the engagement.

Engagement terms are generally: Individual hourly, 3 months, 6 months, and 12 months, with rates decreasing for longer term engagements.

Rates range is from **Rs.1000/hr** for low-end documentation and testing up to **Rs.1200/hr** and higher for top-level project management and high-end technical development.

Maximize Value :

Our rates are structured to maximize the value for our clients. Rates are scaled according to the type of work done and the experience of the individual doing the work. Insight staffs projects with the proper combination of team members to maximize the return for the customer thus saving them time and money.

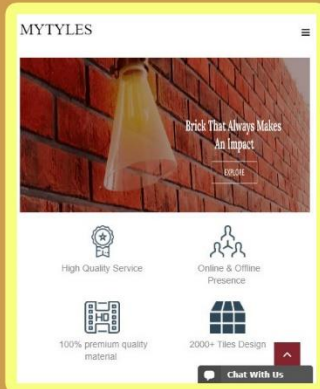

Billing and Payment:

Our standard billing practice is to invoice semi-monthly with payment due within two weeks of the invoice date. This practice is used on all hourly contracts unless a separate payment arrangement has been negotiated. Billing terms on fixed price contracts is always defined within the project's contract. These terms generally reflect a percentage up-front, a percentage upon completion of a significant milestone, a percentage upon delivery, and a percentage as a retainer until final acceptance by the client.
